

August 2022 Newsletter #2

Product News, Announcements and How-To Videos

[Model Train Technology Website](#)

Hello everyone and welcome new subscribers!

This issue of the newsletter introduces one more piece of the

G Scale product set – the Outdoor Sound Module. We have the cross-buck flasher but the case for the sound module needed a redesign to be usable outdoor. Below is the link to the product introduction video as well as a showing of the G Scale Flasher SOLAR kit.

We have also added quick connect JST plugs and sockets to the G Scale line so it is truly plug and play.

Customer Layout Picture gallery?

Quite a number of folks asked if we could put more customer implementation pictures on the website. These would be pictures of one or more of our products shown installed. Let us know if you want to show your name. It would be First Name, Last Initial.

IF YOU SEND ME THE PICTURES I WILL POST THEM ON A NEW PAGE ON OUR WEBSITE. EMAIL to:

SUPPORT@MODELTRAINTechnology.com

OR TEXT THEM TO [407-242-5436](tel:407-242-5436).

Products in the works....

We have a dozen new product ideas that are in various forms of development and incubation. However, we need little help prioritizing them. Now that we have learned more about the survey system we're going to give it another try. We appreciate your input!!

The survey is at the end of this news letter.

DCC Relay Controller Passes NMRA

We are please to report that another of our products passed the NMRA Compliance testing – the DCC Relay Controller.

Yeah! Thank you to the many people at the NMRA who were involved including Andy Zimmerman, Mark Juett, Larry Egging and Ken West. They are the unsung heroes who assure that our products meet high standards and that products from different manufactures work together. Thank you!

Medford Railway Park (Oregon)

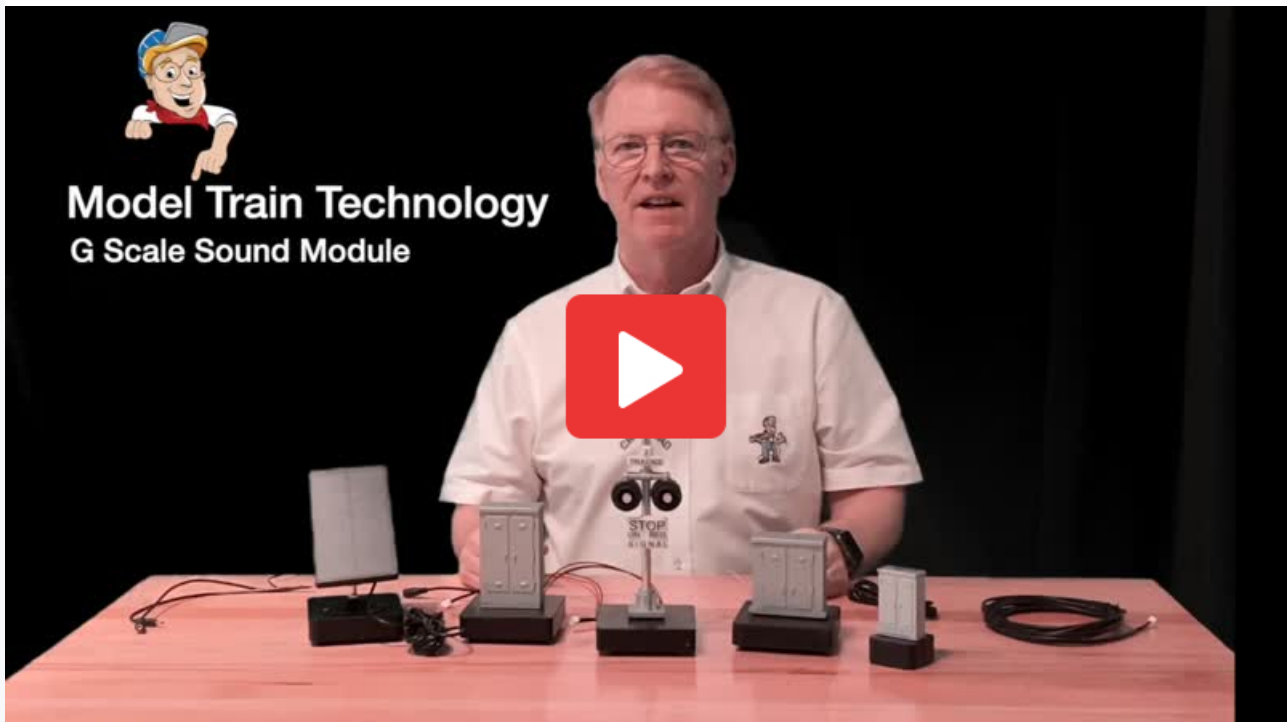

The folks at Medford Garden Railroaders in Medford, Oregon were kind enough to send this short video clip of our Signals in action one their G Scale layout. thanks Mike!! On their Facebook page there are some video of a beautiful steam engine train.

For more info here is their Facebook link:
